

This lamp consists of 2 staggered layers of metal sheets. The light from the light bulb in between the 2 sheets is reflected against a solid steel sheet diffusing the light in the room while a perforated metal sheets in the front indirectly reflects the light against the back and filters the direct light to the front.

Original Design: 1953

Color: white

Materials: painted aluminum, brass

Watts: 60W max

Voltage: 120V - 60Hz

Indoor use and dry locations only
